

## What We Provide:

FMS provides Emergency Preparedness Consultations that strengthen readiness for disasters, pandemics, mass-casualty incidents, and other crises. We deliver risk assessments, tailored Emergency Response and continuity plans, staff training and exercises, facility and communication system reviews, patient-flow and triage strategies, regulatory alignment, and recovery and after-action support.

## Why Organizations Need Emergency Preparedness Consultations

A strong emergency preparedness plan protects people, minimizes disruption, and ensures organizations can respond confidently during any crisis.

- Identify vulnerabilities before they become threats
- Ensure compliance with OSHA, FEMA, and CMS requirements
- Strengthen response plans for natural and man-made emergencies
- Improve staff readiness through training and drills
- Maintain business continuity and reduce operational downtime
- Supports accreditation and regulatory requirements

## Scope of Assessment

### Risk & Hazard Identification

Identify natural, technological, and human-related threats that could impact your facility.

### Emergency Response Plan

Assess existing plans or build new OSHA/FEMA-compliant procedures tailored to your operations.

### Evac & Communication Strategy

Review evacuation routes, staff roles, communication flow, and emergency notification systems.

### Readiness Assessment

Evaluate staff preparedness and identify gaps in drills, competencies, and response execution.

## Process

### 1 On-Site Assessment

We walk your facility, review current procedures, and meet with key personnel to understand operations and risks.

### 2 Gap Analysis & Compliance Review

We compare your current preparedness level against OSHA, FEMA, and CMS requirements.

### 4 Ongoing Support

We help implement improvements, conduct training, and support sustained readiness.

### 3 Customized Recs & Updated Plans

You receive clear, prioritized improvements with actionable strategies tailored to your facility.
