Life Safety Plan Updates

What We Provide:

Our comprehensive Life Safety Plan (LSP) update identifies fire and life safety features on a zone-by-zone basis. Plans document occupancy use, sprinkler coverage, fire- and smoke-rated barriers, hazardous storage areas, sleeping/non-sleeping suite boundaries, smoke compartments, and chutes/shafts. Our team works with Facilities, Safety Officers, Engineering, and Leadership to ensure compliance with NFPA 101-2012, AHJ, and Accreditation Organization standards.

Why Organizations Need Life Safety Plan Updates

- Maintain alignment with NFPA 101 (2012) Life Safety Code requirements to support accreditation surveys and reduce regulatory and legal exposure.
- Keep life-safety drawings current by documenting renovations, construction changes, system upgrades, and reconfigured spaces that affect safety.
- Detect and address latent hazards before they become survey findings.
- Provide precise plans that inform emergency response, maintenance, and capital decisions.

Scope of Assessment

Facility Life-Safety Features

Identify sprinkler coverage, fire/smoke barriers, hazardous areas, suites, and shafts.

Code & Compliance

Evaluate existing features against NFPA 101, AHJ requirements, and accreditation standards, highlighting areas that meet, exceed, or require remediation.

LSC Summary & Legends

Summarize LSC requirements for existing and new occupancy conditions, and include a legend showing AHJ and accreditation requirements to support inspections, maintenance, and compliance.

Process

1 Preparation

Collect existing drawings, construction documents, and site access information, and establish the project schedule.

2 On-Site Assessment

Conduct a systematic facility walkthrough to verify sprinkler coverage, fire- and smoke-rated barriers, suite boundaries, shafts, and other life-safety features.

4 Review & Final Delivery

Deliver finalized Life Safety Plans in AutoCAD DWG and PDF formats, ensuring accuracy and readiness for accreditation and facility use.

3 Drafting & Code Integration

Update Life Safety Plan drawings to reflect field conditions, incorporating Life Safety Code requirements, legends, and compliance references.
