Mock Survey

What We Provide:

FMS conducts accreditation-modeled mock surveys across Safety, Security, Hazardous Materials, Fire Safety, Medical Equipment, Utilities, Life Safety, and Emergency Management. We partner with hospital leadership and departments to deliver HIPAA-compliant, non-disruptive findings and best-practice remediation guidance.

Why Organizations Need a Mock Survey

A Mock Survey prepares your organization for survey readiness, reduces compliance risk, identifies gaps before regulators do, and strengthens safety, operational reliability, and accreditation confidence.

Our Process

FMS performs a Joint-Commission-modeled building tour and visual inspection of life safety features in accordance with NFPA 101 and NFPA 99

Includes visual review of: corridor and suite doors, smoke barriers, shafts, hazardous rooms, egress pathways, exit signage, extinguishers, alarm devices, detection systems, suppression elements, emergency lighting, and kitchen hoods.

FMS Deliverables

A concise Mock Survey Report (PDF with photos) plus an Excel tracking spreadsheet listing deficiencies, locations, and recommended corrective actions.

Client Responsibilities

- Secure room for equipment
- Most recent Life Safety Plan with all required line types and symbols
- Six-foot ladder and cart
